

We build and deploy AI agents that operate inside your portfolio companies.

Not consultants writing decks. Builders shipping working systems. An extension of your team, not a vendor.

HOW WE WORK

1. **Identify high-leverage workflows** — We audit portfolio company operations for the automation opportunities with the highest ROI: sales, data processing, customer ops, internal tooling.
2. **Build custom AI agents** — Purpose-built agents that integrate with existing systems (CRMs, ERPs, communication tools) and execute real workflows autonomously.
3. **Deploy and iterate** — Agents go live in days, not quarters. We monitor, tune, and expand scope as they prove value.

SPEED TO VALUE

Day 1

Scoping & system access

Week 1

First agent in production

Weeks 2-4

Full agent team operational

Ongoing

Optimization & expansion

WHAT WE'VE BUILT

Multi-Agent Sales Operations

Autonomous AI sales team: prospect research, contact enrichment across multiple data sources, lead scoring, personalized outreach, and CRM management. Running live with 91% data enrichment accuracy.

Rapid Custom Tooling

Production-grade applications — bookkeeping tools, client intake systems, SaaS dashboards — shipped in days, not months. Portfolio companies get working software on timelines traditional dev can't match.

Workflow Orchestration

Coordinated AI agent teams with distinct roles — research, engineering, operations — handing off work, escalating to humans, and maintaining continuity across sessions.

AI-Native Development

We deliver 2-3x the output of traditional teams using AI-augmented development. The same efficiency gains we build for clients power our own delivery.

WHY PE FIRMS CHOOSE GUMBO

- **Portfolio-wide leverage** — One engagement model scales across all portfolio companies
- **AI-native workflows** — 2-3x output through AI-augmented development, built into everything we ship
- **Custom over generic** — Agents built for your specific workflows, not horizontal SaaS
- **Partnership model** — We operate as an extension of your team. Shared backlog, weekly shipping, founder-level attention

- **Human-in-the-loop** — Autonomous execution with human oversight at every decision point
 - **Cost efficiency** — AI agents operating 24/7 at a fraction of equivalent headcount
