

Your **AI** partner across the portfolio.

We help PE firms and their portfolio companies unlock value through AI-driven operations, custom agent development, and dedicated technology teams.

WHAT WE DO

01

AI-Centric Audit

We examine workflows across your portfolio to identify where AI delivers the highest ROI — a prioritized action plan tied to real operational gains.

02

Agentic Development

Custom AI agents embedded in your operations that research, communicate, and execute tasks independently. Not chatbots — autonomous workflows.

03

Engineering Pods

Small, focused teams for product builds, legacy refactors, and system optimizations. Your portfolio's on-demand engineering department, shipping weekly.

HOW WE ENGAGE

01

Day 1

Scoping & system access

02

Week 1

Audit complete or first agent live

03

Weeks 2–4

Full team operational

04

Ongoing

Optimization & expansion

CASE STUDIES

AGENTIC AI

Agentic Business Development

B2B services company — scale outbound sales without adding headcount.

- Coordinated AI agent team for end-to-end outreach
- Automated target research, contact enrichment, lead scoring
- Personalized outreach drafting and CRM management
- Live reply detection with human handoff at decision points
- Replaced multi-person SDR function, running 24/7

ENGINEERING POD

DermSquared

Digital health platform — faster shipping and infrastructure modernization.

- Embedded agent-first engineering pod shipping weekly
- Restructured revenue-driving content templates
- Rebuilt core component library, refactored bottlenecks
- Launched modular SEO for traditional and AI-driven discovery
- Result: faster iterations, cleaner infrastructure, scalable platform

WHY PE FIRMS CHOOSE GUMBO

Portfolio-wide leverage

One engagement model that scales across all portfolio companies

Speed to value

Agents and tools ship in days, not quarters

Custom over generic

Built for your specific workflows, not off-the-shelf SaaS

Partnership model

Extension of your team with founder-level attention

Human-in-the-loop

Autonomous execution with human oversight at every decision point

AI-native delivery

We use the same AI methods we deploy for clients

"They deployed agents in our first week that replaced an entire manual workflow. The speed was unlike anything we'd seen."

— Portfolio Operations Lead
